PROFESSIONAL SUMMARY

BCA graduate and aspiring Java Developer with hands-on experience building web applications using Java, Spring Boot, Spring AI, MySQL, REST APIs, and modern web technologies. Developed an academic Retrieval-Augmented Generation (RAG) application using Spring Boot that processes PDF documents, stores embeddings in a vector database, and generates source-grounded responses using AI. Familiar with object-oriented programming, database integration, backend development, testing, Git, Docker, and real-time web communication. Seeking an entry-level Java Developer opportunity to contribute to backend and enterprise application development.

TECHNICAL SKILLS

Languages: Java, SQL, HTMX

Backend: Spring Boot, Spring AI, REST APIs, Spring Data JPA, WebSocket, NginX

Frontend: HTMX, CSS3, Tailwind CSS

Database: MySQL, SQL, Redis, Chroma Vector Database

AI & RAG: Spring AI, Retrieval-Augmented Generation (RAG), Generative AI, Embeddings, Vector Search, LLM

Testing: JUnit

Tools & DevOps: Git, GitHub, Docker, Maven

Concepts: Object-Oriented Programming (OOP), DBMS, REST Architecture, CRUD Operations, API Integration

ACADEMIC PROJECT

RAG Application Enterprise – AI-Powered Enterprise Knowledge Assistant

GitHub: https://github.com/soloStack-Dev/RAG-application_Enterprise

Developed a RAG application using **Java, Spring Boot, Spring AI, Gemini, MySQL, and Chroma Vector Database**.
Implemented **PDF upload, document processing, embedding generation, and vector-based semantic search**.
Built an AI question-answering workflow that retrieves relevant document content and generates **source-grounded responses**.
Integrated **Spring Data JPA and MySQL** for managing documents, chat sessions, messages, responses, and source references.
Developed the web interface using **Thymeleaf, HTMX, Tailwind CSS, and JavaScript**.
Implemented document processing status tracking and document/chat deletion functionality.
Added **JUnit and Spring Boot integration tests** for application and vector-store workflows.

Technologies: Java, Spring Boot, Spring AI, Gemini, MySQL, Spring Data JPA, Chroma, Thymeleaf, HTMX, Tailwind CSS, JavaScript, Maven, JUnit

EDUCATION

Bachelor of Computer Application (BCA) — Bharath College of Science and Management, Thanjavur, Tamil Nadu | Expected Graduation: May 2026 | CGPA: 7.58 / 10

Relevant Coursework: Data Structures & Algorithms · OOP · DBMS · Web Development · AI/ML Fundamentals · Software Engineering

CERTIFICATIONS

AI for Business Professionals — HP Foundation (HP LIFE) | June 2026
Generative AI with IBM — Naan Mudhalvan Program, TNSDC | November 2025
The MCP Course: Unit 1 — Fundamentals of MCP — Hugging Face | February 2026
Claude Code in Action — Anthropic | February 2026 | Certificate No: bsqe9gvrdq5e

CORE COMPETENCIES & LANGUAGES

Competencies: Adaptability · Self-Motivation · Attention to Detail · Time Management

Languages: English (Professional Working Proficiency) · Tamil (Native)
